DISCLAIMER

The information in this White Paper is subject to change or update and should not be construed as a commitment, promise, or guarantee by the ECO Cashew projects or any other individual or organization mentioned in this white paper relating to the future availability of services related to the use of the tokens or to their future performance or value.

The document does not constitute an offer or solicitation to sell shares or securities. It does not constitute or form part of and should not be construed as any offer for sale or subscription of or any invitation to buy or subscribe for any securities not should it or any part of it form the basis of or be relied upon in any connection with any contract or commitment whatsoever. The ECO Cashew projects expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from reliance on any information contained in the white paper, any error, omission or inaccuracy in any such information, or any action resulting therefrom.

This is not a recommendation to buy or financial advice, it is strictly informational. Do not trade or invest in any tokens, companies or entities based solely upon this information. Any investment involves substantial risks, including, but not limited to, pricing volatility, inadequate liquidity, and the potential complete loss of principal. Investors should conduct independent due diligence, with assistance from professional financial, legal and tax experts, on topics discussed in this document and develop a standalone judgment of the relevant markets prior to making any investment decision.

The information contained in this document may include or incorporate by reference, forward-looking statements, which would include any statements that are not statements of historical fact. No representations or warranties are made as to the accuracy of such forward-looking statements. Any projections, forecasts and estimates contained in this document are necessarily speculative in nature and are based upon certain assumptions. These forward-looking statements may turn out to be wrong and can be affected by inaccurate assumptions or by known or unknown risks, uncertainties, and other factors, most of which are beyond control. It can be expected that some or all of such forward-looking assumptions will not materialize or will vary significantly from actual results.

1. OUR MISSION

After spending the last 20 years in Western Africa and understanding the dynamics of the local communities, we have now set ourselves on a mission to promote Nigeria as a new benchmark of the global Cashew nut industry.

Our mission is simple, get the Cashew nuts closer to the end markets with in-country value creation and the setting up of a full fledged Cashew nuts processing plant. With Fair-Trade concept in mind, we aim to improve the quality of life of the Cashew nuts' farmers by offering better purchase prices.

With the processing of the raw Cashew nuts in Nigeria, our goal is also to cut the supply chain time to the end markets in Western Europe and USA. Over and above the time savings, this will have a massive boost in reducing the Carbon Footprint of the processed Cashew nuts from the current benchmark by around 90%, thus making our product "ECO CASHEW". It is time to act on it and more importantly place decisions in the hands of you, owners of CashewF tokens.

2. OUR VALUES

■ Ecological ■ Fair Trade ■ Local empowerment

3. INTRODUCTION

EcoCashew is a true environmentally sensitive produce of Nigeria!

The installation of the projected processing plant in Nigeria will enable the elimination of unnecessary sea miles for the processing of those nuts, thereby proposing a produce with a 90% Carbon Footprint reduction compared to the conventional Cashew nuts being supplied in Western Europe/USA.

Currently, the Cashews are being transported from the coasts of Western Africa by boat to Southeast Asia for initial processing, after which, the intermediate product is sent to Western Europe/USA for final conditioning and packaging.

Moreover, given the yield of the process, the sea transport of the raw materials to Southeast Asia is not optimal as for every 4 containers that are sent, only 1 is sent back.

In addition to carbon footprint reduction, the Factory will also provide a steady 100+ jobs for the community with the savings on removing the sea freight costs to South-East Asia, the upsides will be shared with the farmers and create a transparent pricing mechanism and further live the value of Fair Trade.

The factory is also setup on regenerative use of energy by recycling the cashew waste as fuel for the steam boiler as well as incorporate a substantial amount of solar power for the running of the facility. We also aim to set up basic school and medical facilities for the community.

4. THE FINANCING PROCESS

EcoCashew will allow any participants to invest through blockchain technology to raise the required liquidity for the installation of the processing factory. It will therefore allow participants of the blockchain to create a market for Farmers to be able to sell their Raw Cashew Nuts locally in exchange for a Fair-Trade price. In counterpart, the Factory will reward the liquidity providers with a return on their tokens.

4.1 Tokenomics

EcoCashew shall be launching 2 distinctive fungible tokens:

CashewF - CSHWF:

Creation of the Cashew Process Factory

CashewF - CSHWF is a utility token and supports the creation of the Factory in West Africa. EcoCashew will offer 7 of 10 million of such tokens as the first stage of the project. We are planning to build up the factory and other infrastructure facilities within 6 months, after completion of the funding requirement ([see Road map](#)).

Cashew - CSHW:

purchase of Raw Cashew at Fair Trade prices.

In addition, the second stage will be launched with 16 of 30 million Cashew tokens (CSHW) to support purchase of raw materials at Fair-Trade prices for the factory to process.

EcoCashew will also launch a limited number of non-fungible tokens – NFT support badges to express appreciation to its big supporters. This is to create a circular economy between the players. Fungible and Non-Fungible are native tokens on the Cardano blockchain. Native tokens are an exciting utility feature for Cardano, which will allow it to handle tokens and cryptocurrencies from other blockchain platforms in the same way and with all the key functionality available to Cardano's native currency, ADA.

EcoCashew will use the Cardano blockchain technology and NFTs to reward token buyers. NFTs are an emerging segment in the global market: virtual tokens for digital scarcity, security, and authenticity. Each NFT is distinct or unique; it is indivisible, and it is not interchangeable for another.

- Buy CSHWF for 100 ADA or more, receive NFT support badge.
- Buy CSHWF for 1000 ADA or more, receive support badge & mention in the supporters' list with URL link.
- Buy CSHWF for 5000 ADA or more. Receive NFT Support badge, mention in the sponsor's section with URL link plus logo publication.

4.2 CSHWF Distribution

Only 10 million CSHWF tokens have been minted and will become available over a period of time as the EcoCashew project matures.

<https://pool.pm/asset1kjiw43flwhta6v9rtm9e75we7fpnnzu0dxqh9w>

70% of the CSHWF supply will be offered to the public, with 3,5% of the total supply distributed to Initial Stake Pool Offering (ISPO) participants among 7 epochs (0,5% every epoch). The allocations going in order of largest to smallest:

Allocation	CHSWF	Percentage
Public	7,000,000	70 %
Team	1,800,000	18 %
Investors	500,000	5 %
Marketing	400,000	4 %
Legal Advisors	300,000	3 %

CashewF Token Distribution

4.3 How to get CSHWF tokens

- Buy on <https://ecocashew.com/airdrop.html>
- Delegate to pools that we have chosen for the ISPO (See the list of ISPO pools).

4.4 How to earn CSHWF tokens

At the initial stage of the CSHWF distribution time, we are offering a 12% annual capital gain on the nominal value of the token price for all CashewF token holders with more than 1.000 CashewF in their wallet. A unique blockchain system will find all token wallets on each first of the month with more than 1.000 CashewF in them and send the value of 10 Cashew tokens ($X \text{ Cashew} + 1.34 \text{ ADA} = 10 \text{ Cashew token value}$) to the Wallets. In addition, you will benefit from the increasing market value of the CashewF token.

4.5 CashewF Supply Schedule, Airdrop Next Trade Distribution Proceeds

We aim to receive 2.95 million ADA in total to install the Cashew processing Factory. Early Birds will receive a higher amount of CashewF tokens.

CSHWF Airdrop Fair Trade Distribution				
	CSHWF price in ADA	Send (ADA)	Receive	Total ADA per million CSHWF
First Million	0.05	2.5 + 1.5	50 CSHWF + 1.34 ADA	50,000
Second Million	0.10	4.0 + 1.5	40 CSHWF + 1.34 ADA	100,000
Third Million	0.20	6.0 + 1.5	30 CSHWF + 1.34 ADA	200,000
Fourth Million	0.40	8.0 + 1.5	20 CSHWF + 1.34 ADA	400,000
Fifth Million	0.60	9.0 + 1.5	15 CSHWF + 1.34 ADA	600,000
Sixth Million	0.75	9.0 + 1.5	12 CSHWF + 1.34 ADA	750,000
Seventh Million	0.90	9.0 + 1.5	10 CSHWF + 1.34 ADA	900,000

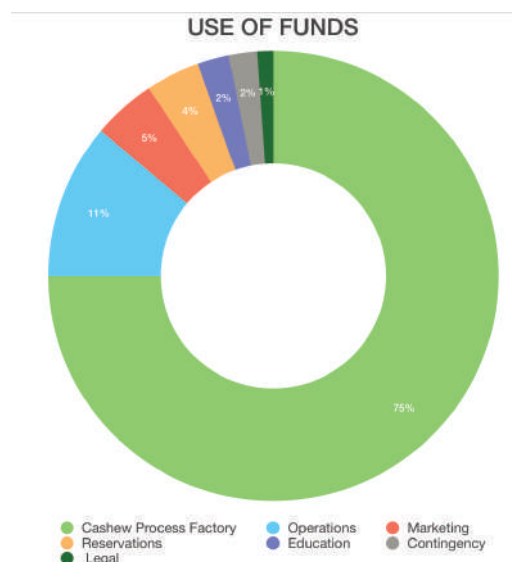

4.6 Use of Funds

The liquidity raised during the ISPO should raise approximately 2.2m US\$, which is the total cost to set up the factory.

Use of Funds of CashewF

MONEY IN	
CashewF Issue Proceeds in ADA	US\$ 2,200,000
TOTAL INCOME	US\$ 2,200,000

USE OF FUNDS	
Cashew Process Factory	US\$ 1,650,000
Operations	US\$ 245,000
Marketing	US\$ 100,000
Reservations	US\$ 85,000
Education	US\$ 50,000
Contingency	US\$ 45,000
Legal	US\$ 25,000
TOTAL	US\$ 2,200,000

5. ROADMAP

Idea

2017

During trips to West Africa and after careful assessment of the local context, one of the founders of EcoCashew had the idea that a local cashew processing factory will be extremely beneficial.

Market research

2018

Extensive market research was done among potential buyers in the Netherlands and other European countries. All parties expressed serious interest in Fair Traded, Eco-friendly cashews.

Agreement made

2019

Agreement was made with a big "Launching Customer" of Eco Cashews in order to complete the business plan.

[Read more SOON!](#)

- Ecocashew Team

Master plan

2020

In 2020 a complete master plan was made for the Eco Cashew Processing Factory involving all stakeholders including representatives of raw cashew sellers, high tech processing machine equipment suppliers and local entrepreneurs.

Funding Blueprint

2021

The first blueprint of the Funding Plan was born.

Whitepaper

Q2 of 2022

In Q2 of 2022 the Social Crowd Funding Whitepaper for the Eco Cashew Factory was published on the website and roadmap.

[Read Whitepaper here](#)

- Ecocashew Team

Community Channels

Q2 2022

During Q2 of 2022 we will setup main community channels like Facebook, Discord, Instagram and Telegram to share the wonderful development about this Unique Eco Cashew Project.

[Join us on Discord](#)

- Ecocashew Team

Tokenomics CashewF

Q2 of 2022

The Tokenomics document of CashewF will give a transparent overview of Token Distribution, Use of Funds and unique utility the CashewF token has for its holders.

[Read CashewF Tokenomics](#)

- Ecocashew Team

ICO & ISO of CashewF

Q2-Q3 2022

ICO (Initial Coin Offering) & ISO (Initial Stake Pool Offering) of CashewF, a Social Crowd Funding Project for the Eco Cashew Factory, Bringing Local Fair Trade benefits, 100+ job creation & Reducing CO2 with distribution of 6 of the 10 million total CashewF tokens.

Factory Preparation

Q3 2022

Preparations of the Eco Cashew Factory in Western Africa with regular updates on our Community Channels.

[Visit us on Youtube](#)

- Ecocashew team

Factory Installation

Q4 2022

Start to install the Processing Factory see regular updates on our Community Channels.

[Join us on Instagram](#)

- Ecocashew Team

Tokenomics Cashew

Q1 of 2023

The Tokenomics document of the public launch of Cashew tokens will give a transparent overview of Token Distribution and Use of Funds.

Factory Testrun

Q1-2023

Testrun of the Processing Factory.

ICO & ISO of Cashew

Q2-Q3 2022

ICO & ISO of Cashew, a Social Crowd Funding Project for the Eco Cashew Factory, Bringing Local Fair Trade benefits, 100+ job creation & Reducing CO2 with distribution of 16 of the 30 million total Cashew tokens.

Factory Opening

Q1 2023

The festive opening of the Eco Cashew Processing Factory will be the start of a better life for many people but also a great start for nature by instantly reducing CO2.

Rewards Distribution

Q2 2023

Finally the CashewF holders will get a monthly reward for holding their tokens in their wallets, if delegated to a group of selected ECO friendly Cardano Pool Operators.

Ecocashew Shipment

Q2-Q3 2023

The First Eco Cashews left the Port and are on their direct route to Europe to their ECO Cashew Customers saving 90% CO2 by taking a direct route made possible by the sustainable Eco Cashew Factory.

Arrival & Distribution

Q3-Q4 2023

Finally the first clients of Eco Cashew will receive their fresh Cashews in Europe/USA.

6. BLOCKCHAIN TECHNOLOGY

6.1 3rd Generation Blockchain

Cardano is a blockchain project founded by Charles Hoskinson and Jeremy Wood. Charles Hoskinson who is also the co-founder of Ethereum developed Cardano to “provide a more balanced and sustainable ecosystem” for cryptocurrencies. Cardano was founded in 2015 and aims to solve problems related to scalability, interoperability, and sustainability on cryptocurrency platforms.

Participants who provide the liquidity to create the local cashew market receive a small return on their tokens, creating a vehicle for passive income at returns usually reserved for large institutions and unheard of for the individual.

EcoCashew is pleased to Launch native tokens on a modern, low energy consuming, Ecological blockchain, the Cardano blockchain.

The Cardano blockchain is a new third-generation blockchain focused on, among other things, proof of stake for throughput and energy efficiency.

6.2 Ecological Blockchain

Cardano uses the proof-of-stake (PoS) model instead of the proof-of-work (PoW) mechanism that Bitcoin pioneered. As PoW is more resource-intensive, Bitcoin transactions use much more electricity than PoS projects, whereas Bitcoin is estimated to use 100 TWh (terawatt-hours) of electricity a year.

In fact, Charles Hoskinson states that “the entire Cardano network is 1.6 million times more efficient than Bitcoin.”

<https://heraldsheets.com/hoskinson-cardano-is-1-6m-more-energy-efficient-than-bitcoin-could-elon-musk-consider-ada/>

Proof of Work

Work is using a lot of energy and computing power whilst proof of stake is energy friendly, would love to see left side less green and right side more green.. so for your information the Proof of work systems are computers that create heat and use a lot of energy and right is indeed holding the stake, left side a drawing of a computer rig with many lights and big cable for BIG amount of POWER

VS

Proof of Stake

Proof of stake, the creator of a new book is chosen in a deterministic way, depending on its wealth, also defined as stake.

Furthermore, maintaining Cardano's network does not require the sophisticated rigs used in "Bitcoin" mining. Because its rigs do not need upgrades as frequently, Cardano produces less electronic waste. Bitcoin's environmental impact even prompted Tesla to suspend it as a payment option and Greenpeace to stop accepting it for donations.

Choosing the Cardano platform also provides us with the amazing opportunity to live our values of Ecology to its maximum.

7. TEAM

7.1 Founder and CEO

Ronald BUIJK – <https://www.linkedin.com/in/ronald-buijk-63679256> A typical serial entrepreneur with over 30 years' experience in International Business in mainly emerging markets, and a strong commercial and financial background. Strong view of prospects and niche markets, he successfully combines work with other commitments and is self-motivated, organized and capable of working under pressure. With a clear, logical mind with a practical approach to problem solving. Enjoying working in a team. Ronald has a diverse knowledge of many industries and down to earth approach.

7.2 CFO

Eco-seed currently growing

7.3 COO

Paul VAN DER LINDEN – Great Entrepreneurial Senior Manager in Producthead Airfreight & Ocean freight - Producthead VAS - Head customer -service * Head operations * supply chain Warehouse manager * Import & Export perishables with a Growth focussed, Profit & Loss responsible Core Competence

7.4 CIO

Emile SCHOEMAKER – <https://www.linkedin.com/in/emile-schoemaker> Entrepreneur with 30 years of experience, Management 200+ Expert to Develop and execute business strategies from scratch to maximal revenue with an entrepreneurial mindset, Team player with great interest in exciting innovative new technology business. Specialized in International Relations > Sales & Marketing > Blockchain Applications with a successful proven track record in business development.

7.6 Advisory & Board Member

Yasvin BUCKHOREELALL – <https://www.linkedin.com/in/yasvin-buckhoreelall-22b11621> Strong P&L leader with a people and culture centric approach. Has been very active in various aspects of the Oil & Gas Midstream to Downstream sector. He has turned around various businesses by focusing on fundamentals and the people that surround them. Very experienced in International Business Development for Infrastructure, Trading & Distribution and has also advised, on energy-related matters, various government institutions. Able to understand very complex project, operational and technical matters, whether for going concerns, greenfield/brownfield development and/or M&As.

7.7 Project Execution Manager

Ernest EKWUNIFE – <https://www.linkedin.com/in/ernest-ekwunife-2255aa1b/> Nigerian engineering entrepreneur, Ernest has built a reputable organization that provides turnkey solutions in engineering, procurement and contracting packages. Strong sense of in-country value creation and community works.

7.8 Project Financial Controller

Adriana BORROME – <https://www.linkedin.com/in/adrianaborrome/> Ms. Borromé is the Account Controller of the EcoCashew project. Analytical, accurate and meticulous Accountant with more than 15 years' experience. Proven effectiveness preparing Financials reports, budgets, analysis, and forecasts in strict compliance with Generally Accepted Accounting Principles (GAAP) and all regulatory standers. Well-versed in all corporate accounting functions. Also, she has Blockchain and Cardano smart contract experience.

7.9 Back Office & Content Manager

Dilshan KARIYAWASAM – <https://www.linkedin.com/in/dilshan-kariyawasam-877b8b214/> Mr. Kariyawasam comes with a vast experience, having spent 15 years in various roles as a professional Accountant, Auditor and Banker

8. SUMMARY

EcoCashew is a project that needs to be fulfilled for all the right reasons, mentioned herewith; namely:

■ Local empowerment ■ Ecology ■ Fair Trade Practice

The CSHWF and CSHW tokens, linked to the EcoCashew Project will enable the said project to raise liquidity through the participants of the blockchain. It is your opportunity to participate in creating 100+ jobs, provide a platform whereby Fair-Trade prices can be practiced, and trigger a much-needed Carbon Footprint reduction.

Typically, the approach would be to go for conventional financing methods, whereby decisions are made by large corporate banks, based on certain criteria. In our case, our success relies entirely on YOU, participant of the blockchain. The decision to make a change for sustainable Cashew nuts is in your hands.

We would like to invite you to join us, with EcoCashew:

Support the EcoCashew project Now!

Supporting Fair Trade is Peanuts!
